Calanus® oil is a new and bioactive form of omega-3. This oil is a natural lipid extract derived from the plankton of northern waters.

Description

NOURSEA

Omega 3 wax esters – Nourished by the sea

Calanus® oil is a new and bioactive form of omega-3. This oil is a natural lipid extract derived from the plankton of northern waters. Calanus® oil comes in the form of natural wax esters. This oil is more powerful and has a better absorption. The form of omega-3 is at least as important as the amount that is taken.

Calanus Finmarchicus is caught in northern Arctic waters. The total biomass is about 300 million tons, several times larger than the total biomass of fish in those waters.

Calanus® oil is the purest and most potent energy package Arctic nature can offer. Also contains 0.1% natural astaxanthin and – in addition to EPA and DHA – SDA (stearidonic acid).

Directions of use

1 to 2 softgels twice daily with or after a meal.
Do not exceed the recommended use.

A food supplement does not substitute for a varied diet and healthy lifestyle. Store in a cool dry place, out of reach of young children.

Interactions and warnings

Interactions

Orlistat reduces the digestion and absorption of oils and fatty acids

Warnings

Use with caution when using antithrombotics and in the case of seafood allergy (crustaceans and shellfish)

Pregnancy / lactation

No data is available on the safety of Calanus oil during pregnancy or lactation

Composition

Ingredients
